

TESTBOY 130

Non-contact magnetic field testers

The magnetic field tester Testboy 15 is suitable for rapid and precise testing of electro-magnetic switches and valves. Their tip lights up to indicate the presence of permanent, DC or AC magnetic fields. Thereby, they are so sensitive that very often it is not necessary to remove covers or cladding from machines and the function check can be carried out without any setting-up time or stopping the machine.

How you benefit:

- | Non-contact checking of all magnetic fields
- | High-performance LED torch

Specifications

Technical Data	TESTBOY 130
Display	Optical, LED
Measurement Range	all magnetic fields
Power Supply	2 x 1,5 V Typ AAA Micro, LR03
Integrated LED-torch Lamp	Yes
Standard	IEC/EN 61010-1 (DIN VDE 0411)
Dimension	160 x 25 mm
Weight	45 g
Colour	Black
Scope of Delivery	incl. batteries
